SEWER AUTHORITY

## \* SPECIAL NOTICE \*

### (With-In One Week)

This is to inform you that a sub-contractor hired by National Water Main Cleaning Co., **Destro & Brothers**, will be replacing your sewer lateral from the property line to the sewer main in the street (see diagram below). To remove the existing sewer pipe and install the new sewer pipe, the contractor will be digging a trench approximately three feet wide (see photo on next page). “DO NOT STAND” signs will be placed along the street the day before work begins to make sure parked vehicles will not be in the way (see photo on next page). The contractor will come back at a later date to fully restore all disturbed lawn, sidewalk and pavement.

The work will tentatively take place for **ONE DAY** between;

**7:00AM – 5:00PM –**

You will receive a 48 or a 24-hour pre-notification on the day(s) prior to actually replacing your sewer lateral. This notification is to make you aware of what will be taking place. ***The above date is subject to change.***

During replacement, the existing sewer pipe is cut out and disconnected from the sewer main before the new sewer pipe is installed. **During this time, what you flush or put down the drain will flow into the trench that construction workers will be in. They would appreciate if you limited the use of water going down your drains to an absolute minimum.**
