

Notice of Vacancy

Date Posted: July 16, 2026

Title of Position: Second-Class Stationary Engineer

Number of Vacancies: Two (2) Provisional Appointment

Salary Range: \$24.84 -\$28.26 hourly

Location: Treatment Plant – Wastewater Division

Shift: 7:30am – 3:30pm

Employment Type: Full Time

Benefits: Full Benefits, Outlined Below

Distinguishing Features of the Class

On an assigned shift, an incumbent is responsible for the operation and maintenance of a high- or low-pressure steam plant, central and remote heating, ventilation and air conditioning systems, compressed air supply, multiple hearth incinerators, and auxiliary equipment. Incumbents perform work, routine in nature, requiring a knowledge of the principles of operating steam boilers, combustion, and various ancillary equipment. A Second-Class Stationary Engineer is assigned to a shift and works under direct supervision from stationary engineer or designated personnel. Various tasks are assigned individually but routine performance of them is usually not subject to immediate review. Work is checked by periodic inspections and repair jobs are carefully inspected on completion.

Typical Work Activities

Operates and maintains high or low pressure boilers and related boiler room equipment such as stokers, pumps, fans and coal and ash handling machinery;

Assists in the operation and maintenance of multiple hearth incinerators and related equipment such as condensate return systems, deaerators, feed water preheaters;

Repairs and checks operating adjustments necessary to maintain multiple hearth incinerators;

Repairs and checks operating adjustments necessary to maintain the heating plant in good and safe operating condition;

Maintains records of operation;

May make minor electrical and plumbing repairs;

May assist boilermakers on major repair work;

May supervise the work of one or more steam heating equipment workers;

Performs related work as required.
